

Dear Member,

This past year was another great year. WYSSA received a Fish Wildlife and Parks grant which is how we were able to bring in the road mix. A huge thank you needs to go out to Board Members, Mark Freedman and KC Tanner for their hard work in getting this put together and submitted.

We hosted our first trap shooting clinic. This was a huge success and we have already planned this years. Saturday and Sunday July 15 & 16th we will have Patricia McLelland-Merydith an award winning trap shooter at the range to instruct 2 fun filled days.

For more information the flyer for the trap clinic is on our NEW! Website. You can now stay up to date with current information by going to the new website <http://www.wyssa.club>. This will have current information and hot calendar items. Another big thank you to Mark Freedman for getting this website up and running.

This years annual meeting will be slightly different also. We are incorporating the annual range clean up with the annual meeting and raffling off one or more guns (depending on the amount of tickets sold). On Saturday June 10 we will all meet at the range at 9:00 am, at 12 noon we will have a BBQ lunch (hamburgers and hotdogs) at the Povah Center in town. The annual meeting will follow beginning at 1:00 pm, the raffle will be the last item on the agenda of the annual meeting.

I encourage you to join us for lunch and the meeting at a minimum (RSVP is requested to make sure we have enough food). While we want to see as many at the range as possible to make sure we keep it nice for member uses, I understand it is a big commitment for most of a day. Do not feel bad for just showing up for lunch and the meeting.

We have applied for more grants this year and will hopefully have information back on them by the time the annual meeting is held so fingers crossed for more range improvements.

Again you can get all the dates and information in this letter on our new website [www.wyssa.club](http://www.wyssa.club).

I am proud to say that we have a very involved and active board. Their focus, is finding ways to make the range an enjoyable, safe place to shoot. As we all know our range is probably one of the most beautiful ranges in the country and we are working hard to keep it that way.

Have a great rest of your and winter and an enjoyable spring. We will see you all this summer!

Sincerely,  
Jason Pond  
President, WYSS
